

The VELUX logo is displayed in white, bold, sans-serif capital letters within a red rectangular box. The background of the entire advertisement is a bright, airy room with a vaulted ceiling featuring several skylights. The walls are finished with light-colored vertical wood paneling. In the foreground, a light grey sofa is adorned with several decorative pillows in shades of green, white, and grey. To the right, a large green plant with broad leaves is visible, along with a small white side table holding another plant. The overall atmosphere is clean, modern, and bright.

Transforming Spaces

# SKY'S THE LIMIT

A NEW SHOW HOME IN NEW PLYMOUTH  
THAT IS REACHING FOR THE SUN

# EMBRACING WARMTH, TEXTURE AND SPACE WITH LIGHT

**“When people walk up the stairs to the lounge, they’re like ‘wow, look at this!’ The light you get in here, the mood and the sensation of space – it just feels fantastic.”**

**ANDRE PAPRILL**

When craftsman building skills combine with skylight installation experience and an understanding of what home buyers want, great things can be accomplished.

Andre Pappriill is a master builder with more than 20 years experience building homes in New Zealand. Having settled in New Plymouth, he operates Andre Pappriill Builders, a residential

building company specialising in high-end architectural builds. In 2018 Andre Pappriill Builders achieved a Gold award at the Master Builders Home of the Year competition.

Andre Pappriill Builders became a Certified VELUX Installer in 2012 and has been installing skylights ever since.

# A SHOWHOME AS A PROOF POINT

Having a showhome to demonstrate his team's ability is part of Andre's recipe for success. It means prospective clients can tour a house that displays their commitment to quality, innovation and attention to detail. It's a two-storey home that makes a real statement from the street. However the real magic happens on the inside.

The main access way that connects downstairs and upstairs spaces also enjoys natural light from the skylight above.

**"In fact, 'wow' is the word I hear most often when showing people around the home."**

**ANDRE PAPRILL**

# CLEVER USE OF SKYLIGHTS

Sunshine, natural light and effective ventilation are always high on every home buyer's wish list. But buyers also want privacy from the neighbours – something that's not easy to achieve in a level subdivision.

"The section had its limitations, particularly with the direction of sunlight," explains Andre. "Enhancing features of the home using natural daylight was a key part of our strategy."

A total of 18 skylights are installed in this home and 8 of them are solar powered, so they can be opened to ease heat gain in summer.

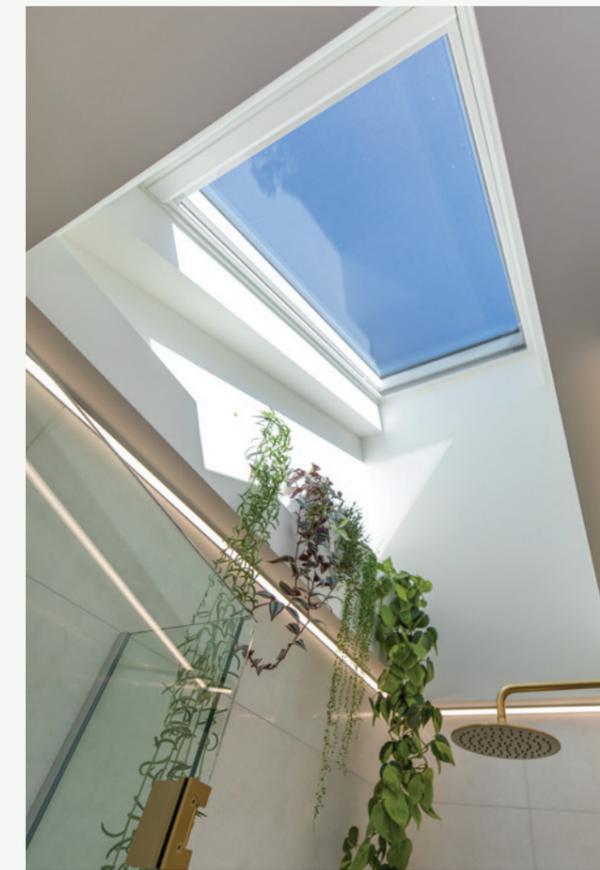

**"The light and view of the sky make you feel like you're outside. It's almost like an outdoor bathroom in Bali."**

“You can watch the stars at night, before you go to sleep and then close the blinds so the light won’t wake you up.”

# MAKING A GREAT IMPRESSION

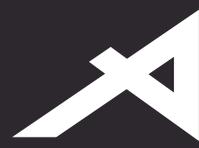

“I wanted to build a home that appeals to just about every genre – families, professional couples and retirees. The use of skylights makes us a bit more unique. We’re the only certified VELUX installers in Taranaki, so we’ve used our experience to create not only light, but a good vibe and feeling for the home. When you enter, you’re welcomed by natural light. It lifts you up and makes you happy.”
